

Have you got space to waste?

... **probably not.**

This is exactly the reason why we want to introduce you to the benefits of safety storage cabinets with full drawers.

THE TASK

A situation known to many users:

- Which conditions should be used when clearing the containers in the cabinet?
- Which containers are on the front of the shelves, which are to the rear?
- Which hazardous materials should be placed on one storage level if possible?
- How can it be guaranteed that the containers from the rear rows can be easily and safely removed?

THE SOLUTION

Safety storage cabinets with drawers make these questions redundant!

- logical storage of small containers
- easily accessible for storage and removal
- storage options for waste containers
- safe and simple collection of waste materials in waste containers

Configure the required number of full drawers according to the quantity and dimensions of containers to be stored. We can offer you the option of storage in up to **9 full drawers** in one safety cabinet.

Safety when placing and removing the containers – no accidental knocking or upsetting of other containers when they are placed in the cabinet or removed.

Convenient – no awkward removal of containers to remove containers from the rear storage area.

The question of whether containers should be at the front or rear does not arise. The full drawer always gives you the **complete overview** of the storage level.

Hazardous materials that should be placed together on a storage level can be easily and **logically arranged in a full drawer**. **Double your possible storage capacity** in the safety cabinet!

For your information

The following 3 comparisons show the possible storage volume with drawers compared to shelves.

width	container	3 shelves	6 drawers	your advantage	
1200 mm	1 and 2 litres	 ~ 95 L	 ~ 190 L	100 % more storage capacity	
900 mm	1 and 2 litres	 ~ 60 L	 ~ 130 L	115 % more storage capacity	
600 mm	1 and 2 litres	 ~ 35 L	 ~ 75 L	105 % more storage capacity
